

INVISIBLE

DOUBLE

DOUBLE-SIDED LOCK

DOUBLE

Double is the concealed 'handle' system for both sliding and pocket doors. Identical in appearance to the B NO-HA mini system for rebated doors, it allows different kinds of doors to have the same design.

MAGNETIC LOCK

DOUBLE + B-MAG

The B-MAG device can be used to close rebated or sliding doors in passage mode, with the best aesthetic and functional result. The use of neodymium magnets ensures a particularly stable closure in all conditions.
